Art Unit: 3634

The proposed drawing (paper #8, dated 1/8/2004) addition of Figure 6 has been approved by the Examiner.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Headrick et al. Headrick et al. disclose a threshold assembly comprising a substrate (26) made up of at least two sections (column 5, lines 29-32 recites a plurality of plastic blocks forming the substrate), an aluminum sill (22) having an upwardly exposed channel, an adjustable cap (13) mounted in the channel, and a side light/panel cap (14) mounted in the channel. With respect to claim 4, it's well known that when plastic is formed and shaped into a device (in this case a substrate) that air or tiny air bubbles are formed therein which is considered a "filler".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Headrick et al. in view of Stanclift. All of the elements of the instant invention are

Application/Control Number: 10/156,391

Art Unit: 3634

discussed in detail above except providing a dovetail interlock and the plastic to be recycled plastic. As shown in Figures 36 and 37, Stanclift discloses threshold elements connected via a dovetail connection. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the substrate of Headrick et al. with an interlocking dovetail connection since the interlocking connection provides rigidity along the length of the substrate underneath the sill. It would have been further obvious to one of ordinary skill in the art at the time of the invention to provide the substrate of Headrick et al. with recycled plastic instead of virgin plastic since recycled plastic is a well known replacement for virgin plastic because it's cheaper to manufacture and recycled plastics would perform equally as well as virgin plastics.

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to Kammerer discloses a threshold connection between two members similar to that of the applicant's invention.

Applicant's arguments with respect to claims 1-8 and 16-20 have been considered but are most in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 703-308-2120.
